Bidders should quote on C, D and E grade asphaltic cements (no estimate of quantities).

Deliveries in the Fresno (District VI) and San Luis Obispo (District V) territories may or may not be requested in tank trucks at the plant and bidders should take such require-

ments into account.

Materials, basis of measurement, and similar requirements are to be in accordance with Sections 69 and 70 of the Standard Specifications of the California Department of Public Works, Division of Highways, dated January, 1935, subject to inspection and release by the Testing and Research Laboratory of the Division of Highways.

Bids are to be submitted on basis of tank car shipments only with the exception of requirements shown for District VI, where deliveries may be taken in either tank trucks at vendor's plant at or near Bakersfield or tank car delivery. Bidders will take this into account and quote for District VI their refinery prices at or near Bakersfield for these products delivered into tank trucks as well as bidding for tank car deliveries from this point.

Quantities shown are approximately only and will be increased or decreased to conform to actual requirements of the Division of Highways for the period of contract.

Prices quoted shall be the top price for each product listed. Bids to be on a unit basis of tons. Award may be made in whole or in part.

Any bidder quoting must have been regularly engaged in the manufacture and sale of road oils and asphalts over a period of at least two years, and during that time shall have maintained one or more refineries engaged in the manufacture of asphalts or road oils.

Bidders must ship in insulated tank cars whenever shipments are so requested in this type of container. Bidder shall have on hand at time of submitting bid an amount of material equivalent to a minimum of 10% of the total amount quoted on, and shall at all times maintain a sufficient stock of material on hand to be able to ship a minimum of ten cars per day on 48 hours notice.

Bids are to be f.o.b. bidder's nearest refinery or refineries with schedule of freight rates to various points.

Specifications may be obtained from the office of the State Purchasing Agent, at Sacramento; for further information contact Mr. L. R. Smith. * 20

State Schedules Bids on Inyo Grading, L. A. Project; San Diego Job Readvertised

SACRAMENTO, March 8.—The State Highway Commission today authorized calling for bids for two contracts, and readvertising a third job. Bids will be opened in Sacramento March 30, for grading and surfacing in Inyo county; and in Los Angeles, March 31, for construction of an undergrade crossing in Los Angeles county, and grading surfacing in San Diego county.

The Northern California project involves grading and placing road-mixed surfacing on about 1.5 miles of highway at Independence in Inyo county.

Storm Delays Plans

Due to storm conditions in the southern part of the state, the State Division of Highways was unable to deliver plans for a grading and paving project in San Diego county, advertised for March 17. Bids on the contract will be opened March 31, it was announced today.

The contract calls for grading and paving with Portland cement concrete and asphaltic concrete about 9.7 miles of the Pacific Highway between Barnett avenue and Miramar road in the city of San Diego.

The specifications remain the same, according to the announcement. Principal items include: 173,000 cubic yards of unclassified roadway excavation; 4,008,000 station yards overhaul; 28,600 cubic yards of imported borrow; 106,200 square yards of preparing subgrade; 973 tons of liquid asphalt; 104,700 square yards of preparing, mixing and shaping shoulders, gutters and dikes, and 205,500 lbs. of bar reinforcing steel pavement and structures.

Sixty Unit Prices

Bids will be taken on sixty unit prices. Bidders may submit bids on one or all of three alternates involving the use of concrete piles not requiring mandrel; mandrel type; or precast concrete piles.

The Los Angeles county project, for which bids will be opened in Los Angeles, March 31, involves construction of an undergrade crossing under the tracks of the Southern Pacific Railroad near Hewitt Station. Grading and surfacing of approaches are included in the contract.

CONTRACTS LET TO CONNOLLY, LOWRIE

WASHINGTON, D. C., Mar. 9.—Award of two Reclamation Bureau contracts to San Francisco firms was announced here today by Secretary of the Interior Harold L. Ickes.

The contracts awarded were: construction of street, driveway and sidewalk grading and surfacing and sewer and water systems at the government camp at Shasta Dam site, The Lowrie Paving Co., \$45,949; and construction of earthwork, tunnel and canal lining, Stations 1594 plus 72 to 1641 plus 15, Yakima Ridge Canal, Yakima Project, Wash., T. E. Connolly, Inc., \$316,142.

Unit prices will be submitted on fifty items. Principal items include 41,000 cubic yards of unclassified roadway excavation; 8500 cu. yds. of structural excavation; 800 tons of mineral aggregate plant-mix surfacing; 44 tons of liquid asphalt 2900 cubic yards of Class A Portland cement concrete pavement; 147,000 pounds of bar reinforcing steel; 1750 cubic yards of Class A Portland cement concrete structures; 430,000 pounds of structural steel; 102,000 pounds of wrought iron plate; 1265 lin. ft. of standard reinforced concrete pipe of various sizes; 1284 lineal feet of extra strength reinforced concrete pipe of various sizes; and 680 lin. ft. of extra strength VCP of various sizes.

Export shipments of windmills during 1937 amounted to 17,091 units, as compared to shipments of 14,030 units in 1936, the Bureau of Census announced.

S. F. BUILDING RETURNING TO 1937 POSITION

15-Day Permit Total Near Million, City Bureau Chief Reports

Construction in San Francisco has hit the pace set during the spring months of 1937, unofficial building permit totals for the first fifteen days of March, 1938, indicated yesterday.

Permits for construction valued at \$986,569 have been issued during the first half of March, according to a tabulation released by Chief Clerk S. J. Rosenblum of the San Francisco Central Permit Bureau last night.

This total exceeds the figure for the entire month of February by more than \$200,000.

FHA Terms Aiding

"The new FHA set-up combined with improved weather conditions have supplied the necessary stimulus to the building industry in San Francisco," Mr. Rosenblum said. "If construction continues at the present rate throughout March the total for the month should equal, if not surpass, the figure for March, 1937, the fourth highest month last year."

It was in March, 1937, that the permit total topped the \$2,000,000 mark for the first time that year. The total dropped slightly in April and rose to a total of \$3,382,962 in July.

The largest increase during the first fifteen days of March was shown by frame construction. Frame building permits for construction valued at \$644,950 have been issued. The total is approximately \$250,000 higher than the frame construction total for the entire month of February. Frame permits for one- and two-family dwellings amount to \$463,950; permits for apartment houses total \$181,000.

Well Above February

The \$986,569 total for the first fifteen days of March is approximately \$600,000 higher than the \$394,946 figure for the same period in February, figures reveal. The March frame permit total is

L. A. FIRM LOW FOR HEADWORKS

LOS ANGELES, March 15.—Contracting Engineers Co., 2310½ West Vernon avenue, Los Angeles, today submitted a low bid of \$158,980 to the Metropolitan Water District for construction of headworks for the aqueduct distribution system near Cajaleo Dam. The work is located between stations 26 plus 09.66 and 31 plus 51.50 of the Upper Distributing Feeder about ten miles southwest of Riverside.

Second and third low bidders were: Griffiths Co., Los Angeles, \$162,645; and Clyde W. Wood, Los Angeles, \$173,755.

BULLETIN OF LEAD INDUSTRIES ISSUED

The March edition of "Lead", a magazine published by Lead Industries Association, Graybar Building, 420 Lexington avenue, New York City, is off the press and ready for distribution, it is announced. Copies may be obtained from the Association at the above address.

The following articles are contained in the new issue: Drip-cap flashings made of sheet lead; Lead-lined sink for amateur photography; Plywood home shows white lead durability; Small applications of lead; Sheet lead, pipe, and fittings in housing project plumbing; Correct installation of gossenecks on lead services; and Lead caulking for Spartanburg, S. C., water project.

more than three times larger than the \$191,700 total for the first fifteen days of February.

Contributing to the February 15-day total were permits for \$118,246 in alteration work and \$85,000 in Class A and B construction.

The fifteen-day March total is particularly encouraging as compared to the February total when it is considered that no permits for 1939 Exposition work or public buildings have been issued this month, Mr. Rosenblum pointed out. In February, three permits for World's Fair construction costing \$108,593 were issued.

N. M. BALL SONS LOW ON TULARE SURFACING JOB

\$33,264 Low Proposal; Griffiths Co. Second Bidder, at \$34,693

SACRAMENTO, March 16.—N. M. Ball Sons, 852 Carmel street, Albany, today submitted a low bid of \$33,264 to the State Division of Highways here for grading and surfacing about nine-tenths of a mile, including shoulder surfacing with roadmix, in the city of Porterville.

DEATH TAKES ENGINEER

SACRAMENTO, March 16.

—Chas. Stockton Pope, widely known highway engineer, passed away here this morning. Mr. Pope was prominent in his profession, and was known throughout the construction industry in his capacity of Construction Engineer for the State Division of Highways.

Griffith Co., Los Angeles, at \$34,693, was the second lowest bidder.

The project is located between Morton and Mulberry streets in the city of Porterville.

Other bidders on the Porterville surfacing contract were: Piazza & Huntley, San Jose, \$36,223; Oilfields Trucking Co., Bakersfield, \$40,819; and Union Paving Co., San Francisco, \$41,217.

Bidders submitted unit prices on thirty-four items.

As customary with State Division of Highways projects, bids were taken under advisement.

Shipments of steel office furniture for January, 1938, amounted to \$1,989,632, as compared to shipments totaling \$1,586,446 in January, 1937, the Bureau of Census reports.

Shipments of fire extinguishing motor apparatus totaled 53 units in January, 1938, as compared to shipments of 50 units in January, 1937, the Bureau of Census reports.

BIDS ON THREE STATE HIGHWAY PROJECTS ASKED

Proposals to Open April 6 for
Work in Kern, Santa Clara,
Alameda Counties

SACRAMENTO, March 22.—The State Highway Commission today authorized three State Division of Highways contracts for advertising, with bids on all three scheduled to open in Sacramento April 13.

The three projects are located in Alameda, Santa Clara and Kern counties.

The Alameda county job involves work along the east approach to the San Francisco-Oakland Bay Bridge between the distribution structure and University avenue, a distance of approximately three and three-tenths miles. Work will include construction of redwood curbs, installation of a water supply line, construction of parking areas and shoulder widening, including application of penetration oil treatment.

Curb Dividing Strip

Work in Santa Clara county advertised today involves construction of a curb dividing strip along about two and six-tenths miles between the Agnew underpass and the North San Jose underpass.

The Kern contract calls for grading and placing plant-mixed surfacing on about eight and three-tenths miles, between the southerly county line and five miles north of Rosamond.

A rush of advertising is anticipated for the next few weeks as the Division of Highways prepares to place under contract the Federal-Aid highway program, for which funds have been released officially by Secretary of Agriculture Henry A. Wallace.

(Complete lists of bid items for contracts advertised yesterday appear in Advance Report section today.)

CCC youths will act as guides for the Federal exhibit at the 1939 World's Fair of the West in the \$500,000 building to be erected by the United States government.

FEDERAL AID FUND TO BE RELEASED

California's federal-aid highway program, delayed since the first of the year, may get under way shortly, according to word received Saturday by Secretary-Manager Floyd O. Booe of the Northern California Chapter, Associated General Contractors. He received the following wire from Congressman A. J. Elliott of Tulare, member of the House roads committee:

"Expect California 1939 grant Federal Aid highway funds to be released today."

Plan Meetings for REA Project Users

DAVIS, March 22.—Ten Meetings to give information to those farmers who will become users of electricity under the Surprise Valley project in Modoc County, have just been held by J. P. Fairbank, extension specialist in agricultural engineering, and J. R. Tavernetti, assistant agricultural engineer in the College of Agriculture on the Davis campus of the University of California.

The Surprise Valley project was fostered by the Rural Electrification Administration, which put \$500,000 into it. There will be 300 miles of line, and approximately 1,800 users of electricity. The meetings were held to give prospective users the principles of good lighting, selection and use of electrical equipment, and safe, convenient and adequate wiring.

Similar meetings are to be held for the new Imperial Irrigation district project in Imperial county, which will have 600 miles of line and a thousand customers; and for the Plumas-Sierra project, which will have 229 miles of line and 643 users of electricity.

New orders for galvanized range boilers in January numbered 48,035, as compared with 31,314 during the preceding month, the Census Bureau reports.

BIDS APRIL 7 ON TWO AIRPORT PROJECTS HERE

Utilities Commission Will Open
Proposals on Excavation,
Dredging Contract

San Francisco's \$2,850,000 airport improvement program advanced another step yesterday as two calls for bids were issued by the Public Utilities Commission for dredging a channel for a proposed levee and constructing earth and rock fill at the airport.

Bids on both jobs will be opened by the Public Utilities Commission April 7.

Work under the first contract consists of dredging a channel along the line of the levee or levees to be constructed under another contract, and other work of similar nature, it was announced.

Earth Hauling

The second contract calls for loosening, excavating and loading earth at a quarry furnished by the city, and hauling it to the airport. Approximately 520,000 cubic yards of earth are involved.

The earth will be placed as follows: levee around landing field extension, 400,000 cu. yds.; northerly extension of landing field; 80,000 cu. yds.; miscellaneous roads and fills, 40,000 cubic yards.

At a quiet meeting of the Department of Public Works no formal bid calls were issued. No bids were submitted to Director Wm. H. Worden for improvement of where-nots in the vicinity of Brewster street. The job will be re-advertised shortly, it was announced.

SEVERIN ELECTRIC IN NEW QUARTERS

With business continually expanding, Severin Electric Company San Francisco electrical contractors and engineers, have moved to new and larger quarters, it is announced. Formerly located at 172 Clara street, the firm now is located at 234 Ninth street, San Francisco. The new telephone number is MARKET 5522.

URGE ELEVATED SPEED HIGHWAY STUDY BY STATE

**S. F. Safety Council Directors
Ask Investigation by
Works Department**

Directors of the California Safety Council of San Francisco yesterday approved a resolution asking that the State Department of Public Works allocate funds and assign personnel to investigate the feasibility of the overhead express highway plan for the solution of the rapid transit problem in large California cities.

The action followed a meeting of the Council attended by approximately 100 guests at which the overhead express highway plan was outlined by Lynn Atkinson, of Los Angeles.

Guest of honor at the meeting was Director Earl Lee Kelly of the Department of Public Works, who was presented with a citation for his contribution to safety and for his creation of the safety engineering committee. The citation was presented by George Gay on behalf of the California Safety Council.

Rapid Transit Problem

President Fred D. Parr of the Council introduced Lynn Atkinson who spoke in favor of the overhead and express highway plan as the solution to the rapid transit problem in San Francisco, Oakland and Los Angeles.

The plan calls for construction of overhead highways paralleling main arterials running through downtown sections into residential sections. The overhead highways would not be constructed over any present streets, but between existing arterials.

The plan is based, in part, on the results of an extensive traffic survey conducted by the engineering department of the Automobile Club of Southern California. Exact engineering data and methods of financing have not been determined at this time.

In his address, Mr. Atkinson restricted himself to outlining the plan and endorsing the resolution prepared by the Safety Council.

Unlike Eastern Cities

The construction of subways is not the solution to the rapid transit problem in Pacific Coast cities, he said, because they were not built in the manner of eastern centers. Despite the fact that subways have proved servicable in the East, New York and Chicago are building overhead and express highways.

The present plan is to have a survey conducted by the State Department of Public Works to determine the feasibility of the project. If sufficient backing can be obtained the elevated highways will probably be constructed in Oakland, San Francisco and Los Angeles under the direction of a single authority.

Wiley Recommends Separate Doorbell Transformers Here

Installation of separate bell-ringing transformers for the supply to the door bells and house numbers of each tenant in a building of multiple occupancy yesterday was recommended by Chief Ralph W. Wiley of the San Francisco Department of Electricity.

"The installation of a single bell-ringing transformer for the supply to all door bells and house numbers in buildings of multiple occupancy has resulted in a very unsatisfactory electrical installation condition," Mr. Wiley announced in a statement issued yesterday.

The complete text of the "Bell-Ringing Transformer Installations" bulletin follows:

"The installation of a single bell-ringing transformer for the supply to all door bells and house numbers in buildings of multiple occupancy (flats) has resulted in a very unsatisfactory electrical installation condition.

"Where the transformer is connected to the load side of the meter of one of the tenants of said building and said flat becomes vacant, the meter is removed or the switch ahead of the meter is sealed, making the door bells and house numbers of the other occupancies inoperative.

"We have received many complaints from the tenants of this type of building who strenuously object to the payment of bills for electrical energy used in the operation of door bells and house numbers of the other tenants in the building.

"Unless the bell-ringing transformer is connected to a metered circuit that is separate from the circuits metered by the tenants of the building, this Department recommends that a separate bell-ringing transformer be installed for the supply to the door bells and house number of each tenant in a building of multiple occupancy."

Mr. Kelly, in a short address, commended the California Safety Council for its efforts on behalf of public safety on the highways. He also commended J. W. Vickrey, recently appointed head of the safety engineering committee.

Only six per cent of the fatalities resulting from automobile accidents on the highways can be blamed, directly or indirectly, on the highways themselves, he declared. The human factor was responsible for the remainder, he said.

Shipments of galvanized tanks for hot water heaters showed a slight gain in January over the December figure, according to data prepared by the U. S. Bureau of the Census.

W. G. THORNALLY NAMED OAKLAND EXCHANGE HEAD

**S. F. Exchange Holds Annual
Election, Names Board of
Eleven Directors**

The newly elected Board of Directors of the Builders' Exchange of Oakland held its first meeting yesterday to elect officers, as the Builders' Exchange of San Francisco voted for a new Board of Directors.

The Board of Directors of the Oakland Builders' Exchange, elected last week, voted W. G. Thornally, general contractor, president; William E. McGrath was elected vice-president. H. L. Browne became secretary, and David Nordstrom was elected treasurer.

Elected to Board

The following were elected to the Board of Directors by the Builders' Exchange of Oakland last week: W. F. Thornally, general contractor; William E. McGrath, McGrath Steel Co.; H. L. Brown-Harron, Rickard and McCone Co.; David Nordstrom, general contractor; Henry J. Christensen, general contractor; P. H. Donnelly, contracting plasterer; and A. B. Villadsen, general contractor.

The Builders' Exchange of San Francisco yesterday elected eleven members to its Board of Directors. The new directors are: Jos Ahlback, plumbing and heating; J. W. Bender, roofing contractors; Chas. W. Carle, reinforcing steel dealers; Sam F. Cohn, painter and decorators; Arthur F. Edward, marble dealers; R. J. H. Forbes, concrete contractors; W. H. George, building material dealers; Wm. G. Gilmour, master plasterers; Emil Hogberg, masons and builders; H. N. Patterson, ornamental iron manufacturers; and A. H. Wilhelm, general contractors.

SALES ANNOUNCED BY WESTINGHOUSE

A. W. Robertson of the Westinghouse Electric and Manufacturing Company announces that orders entered, sales billed and net income for 1937 were all higher than 1936.

Net income was \$20,126,408, compared with \$15,099,291 in 1936, an increase of 33 per cent, representing earnings of \$7.53 per share. The 1937 income reflected no non-recurring items, but there were extraordinary items of expense approximately \$2,500,000, including a flood prevention dam at East Pittsburgh, \$424,142, and write-down of inventory on copper and miscellaneous raw materials to market at December 31, 1937. Orders received amounted to \$229,540,061; an increase of 25 per cent over 1936 and second only to the record of \$240,220,555 orders received for the year 1929.

Postpone \$2,117,000 Highway Projects To Provide Flood Damage Replacements

Six Northern California highway projects to cost about \$722,000 and 19 in Southern California to cost approximately \$1,395,000, today had been tentatively postponed by the State Highway Commission in an emergency effort to make funds available for repairs and replacements made necessary by recent floods.

Meeting Friday in Sacramento, the commission selected those projects to be delayed.

Official announcement of the action was made by Commission chairman H. R. Judah, who said:

"Postponement of these projects will be definitely effected only after all other funds available for restoration work have been used."

Funds already scheduled to aid in the replacement work include, in addition to the \$2,117,000 which would be made available by postponement of the 25 new projects, the \$1,400,000 set aside by Federal agencies, and \$1,000,000 previously allotted by the State, according to press advices from Sacramento.

Speeding plans for necessary repairs, engineers of the State Division of Highways have completed a survey of the Southern California flood damage to highways and bridges under jurisdiction of the division. Practically all important state highway routes have been reopened to traffic, except where the damage could not be repaired quickly. Maintenance crews have been busy throughout the area. Repairs have been invited for road-dix to replace washed out shoulders where pavement was not damaged, and have already been received for the rental of needed extra equipment, some of which will be used only for a short time but part of which is expected to be in use for the better part of a year.

Projects Listed

Northern California projects placed by the commission on the "postpone" list included the following:

Mendocino County—Christine to Lynn Creek, \$56,000; Yolo, Dunnigan from Vacaville Road, \$210,000; Colusa, Stony Point to Northwood Park and Stone Point Road to Sebastopol, \$216,000; Santa Cruz, near Westernman Gap and Waddell Creek northerly, \$90,000; Fresno, Dunlap to Forest Boundary, \$150,000.

BULLETIN ON ALKALI SOIL RECLAMATION

"The Reclamation of Alkali Soils," by W. P. Kelley. Bulletin 17 of the University of California, College of Agriculture, Agricultural Experiment Station, Berkeley, is ready for distribution. Copies may be obtained upon request to the above address.

The bulletin discusses the reclamation of black-alkali and white-alkali soils; chemical effects of treatments; the physical condition of the soil, and the importance of good farming methods.

WEBER TO DISCUSS HIGHWAY PROBLEMS

Harold D. Weber, newly appointed Secretary-Manager of the Oakland Chamber of Commerce, is the March of Progress guest of the California State Chamber of Commerce, at 7:45 p.m., Monday, March 21, on radio station KLX.

Weber, as a member of the State Chamber Regional Highway Committee, will speak on problems of highway construction and planning. He will be the fifth speaker in the present series on problems affecting this district.

SHASTA TUNNEL WAGE SCHEDULE STILL PENDING

Labor schedules for the Shasta by-pass tunnel section of the Central Valley Project will not be available for another week.

This was the word received Saturday from Senator John B. McColl by Secretary-Manager Floyd O. Booe of the Northern California Chapter of the Associated General Contractors of America.

A new date for opening bids for construction of the by-pass tunnel and temporary relocation of the Southern Pacific Railroad at Shasta Dam, Kennett Division, Central Valley Project, shortly after the labor schedules are established, it is believed.

Determination of the rate of wages to be included in the specifications for the job have held up action on the project for several months.

Originally, bids were called for February 21. This bid call was cancelled, and it was announced that bids would be opened about March 14. No move to set a definite date for opening bids has been made since the latter announcement late in February.

However, with announcement of labor schedules expected shortly, hopes are being expressed that a definite bid opening date will be set next week.

The 240-day job involves construction of a by-pass tunnel under the site of the proposed Shasta Dam through which tracks will run until such time as permanent relocated tracks are laid.

LETTINGS SPEED WORK ON STATE BUILDING JOBS

To Complete \$23,700,000
Projects in State Program
By July, 1939

The \$23,700,000 state building program, under which a large number of contracts have been awarded in recent weeks, will be completed on schedule by June 30, 1939, State Director of Public Works Earl Lee Kelly declared this week in Sacramento.

Undertaken by the State Division of Architecture, the two-year program is the largest of its type yet initiated by the state. Grants from the PWA aggregating \$4,200,000, together with \$19,500,000 in State appropriations, are financing the program.

The building program includes among others the following major projects:

The California State Fair, \$1,350,000 for grandstand extension, new administration, dairy products, educational, fine arts, Future Farmers and 4-H Club buildings.

New state office building at 10th and N Streets, \$1,800,000.

Additional offices and storage space for the state printing plant and state purchasing department at Tenth and P Streets, \$200,000.

Remodeling of the former California National Bank Building at Seventh and J Streets to house the state treasury, \$150,000.

New prison in Southern California for first offenders, \$3,500,000.

State exhibit building at the Golden Gate International Exposition on Treasure Island, \$1,500,000.

New ward building, laundry and minor buildings at the Napa State Hospital, \$1,185,000.

New ward building, laundry and bakery at the Stockton State Hospital, \$360,000.

Two detention cottages and four dormitory cottages and other minor improvements at the Sonoma State Home, \$1,500,000.

New barracks building and other structures at the Yountville Veterans Home, \$950,000.

Ward at Agnew

New ward building and hospital improvements at the Agnew State Hospital, \$725,000.

Four ward buildings, two detention cottages and other improvements at the Pacific Colony for the Feeble Minded, \$1,500,000.

New dormitories, hospital facilities, attendants' quarters and water supply for the Camarillo State Hospital, \$2,767,000.

New dormitory for the Industrial Home for the Adult Blind in Oakland, \$200,000.

New orders for fabricated steel plate during January 1938 amounted to 23,422 short tons, as compared to orders for 27,463 short tons during December, 1937, the Bureau of Census announces.

BIDS APRIL 27 ON WASHINGTON HIGH GYM, FIELD

Bids Called on \$226,000 Boys' And Girls' Gymnasium and Athletic Field

Bids for construction of the \$226,000 boys' and girls' gymnasium and athletic field for George Washington High School yesterday were called by Director Wm. H. Worden of the San Francisco Department of Public Works.

Bids on the entire job will be opened April 27.

Bids will be taken under five propositions. Proposition 1 calls for general construction of the gymnasium complete; Proposition 2 calls for construction of athletic field. The remaining propositions provide for deductions if: (1) the east grandstand is omitted; (2) if two play yards are omitted; and (3) if all planting is omitted.

The gymnasium and athletic field will be awarded under separate contracts, City Architect Chas. H. Sawyer announced yesterday. The estimated cost of \$226,000 is for the gymnasium alone, he said. The cost of the athletic field has not been estimated.

The boys' and girls' gymnasium will measure 165 by 110 feet in size. The structure will have a steel frame and reinforced concrete construction. A composition roof is called for in the specifications.

The George Washington High School gymnasium, located in the block bounded by Geary boulevard, Balboa street, Thirtieth avenue and Thirty-second avenue, will house a large gym floor divided by a folding partition, shower and locker rooms, offices and miscellaneous rooms.

The athletic field will be a full-size football field. Two grandstands, east and west, are contemplated. They will be 318 feet long and will seat approximately 3,000 spectators each. In addition, two bitumen-surfaced play yards will be constructed.

It will be noted that one grandstand and both play yards may be omitted under the terms of the contract.

BASICH BROS. LOW ON INYO CO. JOB

SACRAMENTO, March 30. Basich Bros., Los Angeles, at \$19,677.10, today submitted the low bid to the State Division of Highways for grading and placing road-mix surfacing on about 1.5 miles of highway at Independence, Inyo Co.

Vido Kovacevich, South Gate, was the only other bidder on the job. Kovacevich submitted a bid of \$19,792. The work involves: 2750 cubic yards of unclassified excavation; 214 tons of liquid asphalt and 2575 cubic yards of aggregate of various types.

BIDS APRIL 19 ON TWO STATE BUILDING JOBS

SACRAMENTO, Mar. 29.—California's \$23,700,000 State building program, in which many contracts already have been let, received added impetus today as two additional projects were advertised for bids by State Architect George B. McDougall.

Bids on both projects will be opened in Sacramento April 19, Mr. McDougall announced.

Buildings to be constructed under contracts advertised today will be located at California Polytechnic School in San Luis Obispo and at the Stockton State Hospital.

Work at California Polytechnic School includes construction of Classroom Units Nos. 1 and 2. They will be wood frame buildings. Exterior walls will be covered with wood siding, while roofing will be of composition shingles. Interior walls will be lined with wallboard. Doors and windows will be of wood.

To be constructed at Stockton State Hospital is a vegetable preparation building, a one-story reinforced concrete structure. The building will have steel windows, steel columns and beams, wood roof framing and wood roof sheathing. Partitions will be of hollow tile and wood framing.

SHASTA BYPASS BIDS APRIL 11, REPORT STATES

Official Statement Expected Shortly; Other Work Progressing

SACRAMENTO, Mar. 30.—Bids for construction of the Shasta Bypass tunnel will be opened in Sacramento April 11, it was unofficially reported here today.

Bureau of Reclamation officials here said they could make no official announcement of the new opening date, pending receipt of word from the Denver office. Official notification of the new bid opening date was expected momentarily.

Progress Shown

Meanwhile work on the Kennett division of the Central Valley Project showed progress on other fronts.

Official notice to proceed was sent to Lowrie Paving Co. of San Francisco, contractor for street, sewer and water system work at the Government camp at Kennett. Construction under this \$45,941 contract, awarded earlier this month, is expected to get under way immediately.

Material contracts aggregating approximately \$8200, covering supplies for the camp water and sewer systems, have been awarded within the past few days. They were let to the following firms:

Material Contracts

Gladding, McBean & Co., San Francisco, clay sewer pipe and fittings and grease traps.

Crane-O'Fallon Co., Denver, Col., put packing, and pipe fittings.

Collins Concrete and Steel Pipe Co., Portland, Ore., joint compound, corrugated metal pipe culvert, manhole frames and covers.

United Pipe and Supply Co., San Francisco, asphalt-dipped steel pipe and fittings, valves, etc.

Consolidated Supply Co., Portland, fire hydrants and wrenches. P. E. O'Hair & So., San Francisco, couplings and bolts.

The firms submitted only unit prices on the items for which these contracts were awarded.

Shasta Dam, Power Plant Bids June 1

PAGE PROMISE FULFILLED AS BIDS INVITED

Dam Will Require 5,610,000 Yards of Concrete, Many Other Items

SACRAMENTO, April 4.—Bids for construction of Shasta Dam and Power Plant will be opened here June 1.

With this momentous announcement by Construction Engineer Walker R. Young of the U. S. Bureau of Reclamation, machinery was set in motion today to initiate construction this year on the largest single unit of California's \$170,000,000 Central Valley Project.

Construction of the diversion tunnel and temporary railroad relocation at the damsite is expected to be underway by the time proposals are received for the dam and power plant contract. Bids for the tunnel are to be opened here next week.

During his recent visit to the coast, Commissioner John C. Page had declared he saw no reason why the dam could not be advertised immediately.

A portion of the materials for the dam and power plant will be furnished by the government, as has been the case with other large reclamation service projects.

The dam will require about 3,215,000 cubic yards of unclassified excavation and 5,610,000 cubic yards of concrete, among numerous other major items.

Bidders will be required to furnish guarantee in the sum of \$2,000,000 with their bids. Amount of the performance bond will be \$5,000,000, while a \$2,500,000 pay-

GEORGE RE-ELECTED BY S. F. EXCHANGE

William H. George was re-elected President of the San Francisco Builders' Exchange at a meeting held Friday, Apr. 1st, it is announced.

A. H. Wilhelm was elected first vice-president, and Emil Hogberg was voted the post of second vice-president. Other officers elected at the meeting of the Board of Directors are: H. N. Patterson, second vice-president; R. J. H. Forbes, secretary, and Chas. W. Carle, treasurer.

Heating Engineers Plan June Meeting

The semi-annual meeting of the American Society of Heating and Ventilating Engineers will be held at The Homestead, Hot Springs, Va., June 20 to 22, according to an announcement by E. H. Gurney, president of the Society.

A meeting of the Society's Committee on Research and three technical sessions, at which a number of engineering papers and reports will be presented, will feature this year's summer meeting, together with an extensive entertainment program. Between 300 and 400 technical experts in air conditioning, heating and ventilating are expected to attend.

ment bond likewise will be required.

A completion time of 2,000 calendar days after receipt of "notice to proceed" will be allowed. Partial payments for the work will be made monthly to the successful bidders under terms of a special contract clause.

"BOTTLENECK" JOB IN MARIN OUT FOR BIDS

Proposals on Five Northern Jobs Open Apr. 27; L. A. Project Bids Apr. 28

SACRAMENTO, April 5.—Six contracts for highway and grade separation projects went out for bids here today as the State Highway Commission continued its authorization of contracts in the 1939 Federal-Aid program for advertisement.

Bids on five Northern California projects will be opened in Sacramento April 27 and on one Southern California job in Los Angeles the following day.

Largest of the Northern California jobs to go out for bids today is the so-called "Marin Bottleneck" project, located between Ignacio and San Rafael. About 7 miles in length, the project involves grading, surfacing with Portland cement concrete, asphalt concrete and plant-mix, widening of existing structures, and construction of a grade separation structure.

Other jobs advertised today were located by counties as follows:

Siskiyou: 24.1 miles soil cement base and road-mix surfacing.

Tehama: Grading and paving with Portland cement concrete about one-half mile at Red Bluff.

Sacramento: 3.1 miles grading and surfacing between Ben Ali and the Army Air Depot, including construction of a reinforced concrete slab bridge.

Madera: 10.9 miles grading and oil treatment, Madera-Friant road to Keshaw Corners.

Los Angeles: 3.7 miles grading and paving and construction of a reinforced concrete girder bridge, Tunnel Station to Placerita Canyon.

Agreements Reached on Principal Valley Project Problems, Commissioner Reports

Substantial agreement on virtually all phases of complex Central Valley Project problems involving San Joaquin River water rights, Friant Division rights-of-way, and Shasta Reservoir railroad relocation was announced Monday by United States Reclamation Commissioner John C. Page following a busy week of conferences in Sacramento and San Francisco with various irrigation districts, utility representatives and company officials.

Bids for building Ehasa Dam itself will be opened June 1 in Sacramento. Commissioner Page estimated that actual contract work on the dam can be started by August 1. Specifications are expected to be available late this week.

Mr. Page left for Salt Lake City after terming "highly satisfactory" the series of conferences with officials of the Fresno Irrigation District, the Madera Irrigation District, Miller & Lux, Inc., and the Southern Pacific Company. He will go to Bismark, South Dakota for a joint Federal-State conference April 18 and 19 called by the National Resources Committee to discuss irrigation development in the drought area of the Great Plains.

Railway Relocation

Regarding a contract with the Southern Pacific for relocation of 37 miles of its existing line between San Francisco and Portland, Mr. Page said agreement has been reached on all principal points, and it remains only for the attorneys

to complete the necessary contracts for signature.

"The Government will contract the work of excavation, grading, tunneling and bridge building for the new 30-mile line between Redding and Delta, Calif. The Southern Pacific will lay the track and install a block signal system, and will be reimbursed by the Government on a cost basis," Mr. Page said.

"On the Friant Division, our long negotiations with Miller & Lux and their allied interests in connection with water rights have reached the point where we are nearly ready to sign both a purchase contract to acquire the company's vast grass land water rights at the appraised price of \$2,450,000, and an exchange agreement to provide substitute water for the crop lands now irrigated by San Joaquin River water. The substitute water will be furnished through the San Joaquin Pumping System from the Sacramento-San Joaquin delta where an adequate year-round supply will be assured by

Washington Bidder Low, at \$426,475; Negotiations on R. R. Relocation Finished

SACRAMENTO, April 17.—Colonial Construction Co., 326 First street, Spokane, Wash., at \$426,475 today submitted the lowest of 11 bids to the U. S. Bureau of Reclamation for construction of the Shasta bypass tunnel and temporary railroad relocation.

The Washington firm's bid was about \$57,000 under the second low proposal of \$483,820 submitted by Bates & Rogers Construction Co. of Oakland.

Guy F. Atkinson Co., San Francisco, was third low bidder at \$494,296.

Present at today's bid-opening on the first heavy construction contract at Shasta dam site was U. S. Reclamation Commissioner John C. Page.

operation of Shasta Reservoir on the upper Sacramento River. The San Joaquin River water acquired by the Government in the transaction will be conserved and diverted at Friant Dam above Fresno for the benefit of areas of deficiency in Fresno, Madera, Tulare, Kings, and Kern counties.

STATE OPENS BIDS ON FOUR HIGHWAY JOBS

Jones & King, Sparks & Mundo, Poulos & McEwen Bid Contracts

SACRAMENTO, April 20.—Low bids aggregating more than three-quarters of a million dollars were submitted to the State Division of Highways here today on four major projects, located in Santa Clara Lassen, Mendocino and Santa Barbara counties.

On the largest of the day's jobs, Jones & King, Hayward, submitted a low bid of \$282,703. The contract covers grading and paving 10.9 miles between Coyote and Llagas Creek and construction of a reinforced concrete bridge in Santa Clara county.

Total bids on the Santa Clara contract were:

Jones & King	\$282,703
Hanrahan Co., S. F.	309,962
Union Paving Co., S. F.	332,599
Griffith Co., L. A.	354,535
A. J. Raisch, San Jose	359,265
Chas. L. Harney, S. F.	387,377

For constructing four bridges and grading and paving 2.9 miles in Santa Barbara county, C. O. Sparks & Mundo Engineering Co., Los Angeles, submitted a low proposal of \$278,535.

Total bids were:

C. O. Sparks and Mundo Engineering Co.	\$278,535
Claude Fisher Co., L. A.	280,633

Macco Const. Co., Clearwater	299,709

United Concrete Pipe Corp., Los Angeles

308,684
Poulos & McEwen, Sacramento, at \$106,534 were low bidders for grading and surfacing about 10.4 miles in Lassen county between Nubieper and 8.5 miles northeast of Bieber. Total bids on this contract were as follows:

Poulos & McEwen	\$106,534
J. A. Casson, Hayward	116,055
C. C. Wood, Stockton	127,817
Larson Brothers & Harms Bros., Sacramento	134,808

SAN DIEGO WORK AWARDED TO RYAN

SACRAMENTO, Apr. 18.—David H. Ryan, San Diego, at \$339,886.07, today was awarded the contract for grading and paving with Portland cement concrete about 9.7 miles of highway between Barnett Ave. and Miramar Road in San Diego by Director Earl Lee Kelly of the State Department of Public Works.

Due to an irregularity in Ryan's bid, the award of contract was held up pending an opinion by Attorney General U. S. Webb. In his opinion, Mr. Webb said that although there was an irregularity in the bid he saw no reason why the contract should not be awarded to Ryan since the contractor had shown good faith in the matter.

Hanrahan Co., S. F.	151,989
Pacific States Const. Co., San Francisco	157,943
Union Paving Co., S. F.	162,391

Poulos & McEwen likewise submitted the low bid on the fourth contract of the day, for grading and surfacing 1.5 miles in Mendocino county. The firm's low proposal was \$82,550. Total bids follow:

Poulos & McEwen	\$82,550
C. W. Caletti & Co., San Rafael	89,788
Chas. L. Harney, S. F.	90,199
Young & Son Co., Ltd., Berkeley	91,411
N. M. Ball Sons, Berkeley ..	94,838
Hemstreet & Bell, Marysville	97,255
Fredericksen & Westbrook, Lower Lake	98,817

SOIL MECHANICS OUTLINE PLANNED

The soil mechanics committee of the Structural Engineers Association of Northern California, under Chairman T. P. Dresser, has prepared a brief outline covering developments in soil mechanics with the aim of publishing it for members. Emphasis is being placed on classification of soils. Several papers have been submitted for study.

STOLTE LOW FOR OAKLAND SCHOOL RECONSTRUCTION

Alameda Firm Submits \$71,360 Low Proposal on Eastbay Project

F. C. Stolte Co., 1450 San Antonio avenue, Alameda, yesterday submitted the lowest of eight bids to the Oakland School District for reconstruction of the Golden Gate School.

Amount of the low proposal was \$71,360.

The school, located at 63rd street and San Pablo avenue, is a wood-frame and stucco structure. Plans for the reconstruction job were prepared by Architect W. G. Corlett of Oakland.

Complete basic bids on the contract were as follows:

F. C. Stolte Co., Alameda	\$71,360
Peter Sartorio, S. F.	79,825
C. N. Swenson Co., San Jose ..	83,222

The addition will be a one-story reinforced concrete structure. It will have hollow tile partitions, steel windows, and single tile and composition roofing.

15 MILLIONS ALLOTTED FOR S. F. HOUSING

Local Housing Authority Meets As Straus Announces Allotment

The \$15,000,000 which San Francisco had requested for its participation in the U. S. Housing Authority's slum-clearance and low-rent housing program, yesterday was definitely allotted in Washington.

Press advices from the national capital said Housing Administrator Nathan Strauss had announced earmarking of funds for the San Francisco program.

The local authority was to meet here late yesterday to discuss plans for projects in San Francisco. The meeting was to be held in the office of Chairman Walter Sullivan.

Other members of the San Francisco Authority are M. M. Giannini, Alexander Watchman and Miss Alice Griffith. A fifth member is to be named shortly by Mayor Angelo Rossi.

A model of the cyclotron, or atom smashing machine, will be shown in actual operation at the 1939 Golden Gate International Exposition.

STATE PAVING, SPAN PROJECTS OUT FOR BIDS

Division to Open Bids May 18 On Mendocino Bridge, Stanislaus Paving

SACRAMENTO, April 26.—Contracts covering work in two Northern California counties were authorized for advertising today by the State Highway Commission.

Bids on both projects will be opened at the State Division of Highways offices in Sacramento May 18, it was announced.

The contracts which went out for bids today call for construction of a bridge in Mendocino county and for grading and paving in Stanislaus county.

Bridges Creek Span

The Mendocino bridge will be located about 21 miles south of Garberville. It will carry the State highway across Bridges Creek.

The bridge will consist of one 38-foot steel beam span; four 19-foot, and one 15-foot timber spans, all on concrete footings and timber bents; and two 19-foot timber side-hill spans on concrete footings. The contract also includes grading and surfacing approaches.

The Stanislaus paving job involves grading and paving with Portland cement and asphalt concrete about five and eight-tenths miles between Modesto and Salida. The job involves construction of reinforced concrete bridges as well as road work.

SALES GAIN NOTED BY WESTINGHOUSE

Although bookings during the first quarter of 1938 were 49 per cent less than during the first quarter of 1937, March business showed an increase of nearly \$4,000,000 over February, it was reported at the recent annual meeting of stockholders of the Westinghouse Electric and Manufacturing Company.

Bookings (incoming orders) for the first three months of the year totaled \$37,998,569. During the same period of 1937 they were \$74,242,584. March 1938 bookings were \$15,126,588; February bookings were \$11,439,127.

COLORADO RIVER PROJECT.—Until June 6, 2 P. M., bids will be received by the Indian Irrigation Service, 340 Eighth and Figueroa Bldg., Los Angeles, for construction of a diversion dam on the Colorado river at Leadgate Rock, approx. one mile above Parker Ariz., the Colorado River project. Plans call for a rolled earth fill dam, a portion of which will be in Arizona and a portion in California. The dam is to be 45-ft. above the river bed; total crest length 1450 ft.; excavation for the foundation will be 35 ft. below the river bed. The spillway will be constructed through the Arizona abutment of the dam, bottom width 245 ft.; depth of excavation from 12 to 135 ft. Excavation will be approx. 1500 ft. long, 550 of which will be concrete lined. Included in the contract will be 2000 ft. of concrete lined canal, bottom width 26 feet, average depth of excavation 80 ft. The dam will be constructed from materials excavated from spillway and canal with the exception of a small amount of borrow and fine materials. Borrow probably will be adjacent to dam site. In addition to the dam and spillway a protective barrier will be constructed about 850 ft. downstream. This will consist of lower fill protected by a heavy blanket of rock riprap. Flow thru the spillway will be controlled by 7 20x30-ft. radial gates and two 15x20-ft. gates. Flow through the canal will be controlled by two 12-ft. 6-in. x 20-ft. radial gates. The contractor is to furnish everything except radial gates, hoists and all metal and electric materials and equipment. The right to supply cement and reinforcing steel is reserved by the government providing option is exercised prior to date of order for contractor to proceed.

Approximate quantities are:

- (1) lump sum diversion and care of river during construction;

CONTRACT PENDING

LOS ANGELES, Calif.—Northcutt Ely, Attorney for the Los Angeles Bureau of Power and Light, has announced that the Interior Department has tentatively approved contracts for a third circuit from Boulder Dam to Los Angeles and delivering delivery of power to the Metropolitan Water District until June 1 of 1940. Drafts of the contracts have been sent to the governors and members of Congress of the seven Colorado River Basin States with request for comment. The contracts will become effective upon signing by Secretary of the Interior Harold Ickes. The contract obligates the city to increase the capacity of its transmission facilities by 150,000 kilowatts, and to take an additional 700,000,000 kilowatt hours of Boulder power annually with adjustments for a three-year absorption period commencing Dec. 1, 1939. The attorney stated that the city has \$12,000,000 cash on hand with which to build the third circuit and would repay the government the \$5,000,000 cost of additional generating machinery in 50 annual payments instead of the ten as provided in the original lease. A proposed new contract with the Metropolitan Water District provides for use of power in kilowatt hours over a 15-year period, starting June 1, 1940. * 20

Permit Gains in San Francisco Continue As April Values Total Over \$2,319,000

Value of building permits issued in San Francisco continued to rise in April despite a number of unfavorable factors, including unpredictable weather and the arrival of renewal time for several union-contractor wage and hour agreements.

The month's total was \$2,319,280, Chief Clerk S. J. Rosenblum of the Central Permit Bureau announced. This was about \$150,000 over the March figure, and approximately \$347,000 ahead of the total for April last year.

Expansion of building activity on Yerba Buena Shoals, site of the 1939 Golden Gate International Exposition, more than took up the slack created by a falling off in permits for new frame construction and alterations.

Frames Lower

Frame permits dropped to \$839,125 (about normal seasonal volume) from the 10-year record total of \$1,252,390 chalked up in March by San Francisco home-builders.

Alterations likewise declined from the March figure, with a \$324,265 total in this classification last month as compared with a total of \$446,594 for the preceding month.

Swelled by the permit for the Federal exhibit building, for which the contract was awarded Friday, volume of new work on Exposition Island reached a total of \$933,400.

Total value of permits issued since the first of the year is \$6,848,874, slightly ahead of the \$6,509,242 total for the first four months of 1937.

Following is a comparison of classified San Francisco permit totals for April, this year and last:

CURTIS LOW ON WIDENING JOB

LOS ANGELES, May 5.—George R. Curtis Paving Co. today submitted low bid to the office of the State Division of Highways here for about a mile and one-half of grading and pavement widening in Los Angeles county. Amount of the Los Angeles contractor's low proposal was \$34,413.

The contract involves grading, widening with Portland cement concrete, and plant-mix surfacing on approximately 1.5 mi. between Philadelphia street and Painter avenue in Los Angeles county.

Re-Mapping Started By Army Engineers

San Francisco bay area counties are being re-mapped for Army purposes, it was announced this week. Handling the work is Company A, 29th Engineers, transferred recently to Fort Barry in Marin county from Centralia, Wash.

The company is to remain at cently to Ft. Barry in Marin county. The company is to remain at cently to Ft. Barry in Marin county. The company is to remain at cently to Ft. Barry in Marin county.

A total of 2775 square miles will be mapped by the company. The mapping will be done in 11 sections, each containing an area of 225 square miles.

Twenty-two new homes to cost an estimated \$100,800 were started in San Carlos in April, according to figures released by the city building inspector.

STATE INVITES BIDS ON THREE FAIR BUILDINGS

Bids May 20 on Shasta-Cascade, Mission Trails, East-bay Display Structures

Bids for construction of three of the "county group" exhibit buildings planned for the California State \$1,500,000 display at the 1939 Golden Gate International Exposition were invited yesterday.

They will be opened May 20, C. H. Purcell, executive officer for the California Commission for the exposition, announced.

The contracts will be advertised by the State Division of Architecture, acting for the commission.

Buildings authorized for advertising yesterday are the Alameda-Contra Costa county exhibit building; the Mission Trails building, to house exhibits from Santa Barbara, San Luis Obispo, Monterey, Santa Cruz, San Benito and San Mateo counties; and the Shasta-Cascade building.

Plans and specifications for the work may be obtained by interested contractors upon deposit of \$25 for each set at the California Commission offices, Room 411, Pacific Mutual Life Insurance building, 660 Market street, according to State Architect George B. McDougall.

The plans also will be on file for inspection at offices of the State Division of Architecture in Sacramento and Los Angeles, and at the Builders' Exchange offices in San Francisco and Oakland.

Consulting architects for the Mission Trails building were Robt. Stanton of Del Monte and Harold A. Edmondson of Los Angeles.

For the Alameda-Contra Costa exhibit building, Morrow & Morrow of San Francisco were consulting architects.

Consulting architect for the Shasta-Cascade building, which will house exhibits from several counties in that region, was Otto Deichmann.

Architect Timothy L. Pflueger of San Francisco is serving as supervising architect for the Commission, in direct charge of plans for all work.
